DETAILED ACTION

The amendment and remarks filed 6/15/06 have been acknowledged and entered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, does not provide support for "the reference value", and "that is after the first predetermined time period" as is now claimed in claim 1 and 2.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whipple, III et al. (5,330,580).

Whipple et al. disclose a dishwasher includes a sensor for detecting power consumption surges. See the abstract. The reference discloses the amount of liquid provided to the machine is controlled in accordance with the detected power consumption surges. See col. 7, lines 12-16, 24-30, col. 4, lines 59-66, col. 6, line 2- col. 7, line 30, and claim 10.

Whipple et al. do not teach the steps as claimed.

It would have been obvious for one skilled in the art to use the method of controlling the dishwasher taught by Whipple et al. to obtain the claimed invention, because the process as claimed is inherent in the Whipple et al. This is also because the system taught by Whipple et al. is able to perform the steps as claimed.

Response to Arguments

3. Applicant's arguments filed 6/15/06 have been fully considered but they are not persuasive. Applicant's argument with respect to Elick is persuasive, therefore Elick's reference has been withdraw.

4. With respect to Whipple et al, applicant's argument is unpersuasive, for the reason set forth in col. 3, lines 40-50, col. 4, lines 57-66, col. 5, lines 54-57, col. 6, lines 2-15, lines 51-64, and claim 10.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
